

### **AMENDMENTS TO THE CLAIMS**

Please replace all prior versions, and listings, of claims in the application with the following listing of claims, including marked-up claims with insertions indicated by underlining and deletions indicated by strikeouts and/or double bracketing:

1. (Currently Amended) A papermaking felt comprising:  
a hydrophilic urethane resin; and  
an anchoring agent comprising N-methylol acrylamide.
2. (Original) The papermaking felt according to claim 1, characterized in that the hydrophilic urethane resin is provided through polymerization of a blocked hydrophilic urethane prepolymer.
3. (Original) The papermaking felt according to claim 2, characterized in that the blocked hydrophilic urethane prepolymer contains ethylene oxide.
4. (Original) The papermaking felt according to claim 3, characterized in that the ethylene oxide constitutes 35% to 95% by molecular weight of the blocked hydrophilic urethane prepolymer.
5. (Original) The papermaking felt according to claim 1, characterized in that the hydrophilic urethane resin constitutes 0.5% to 10% by weight of said papermaking felt.
6. Canceled.
7. Canceled.
8. (Currently Amended) The papermaking felt according to claim [[7]] 1, characterized in that the hydrophilic urethane resin constitutes 0.5% to 10% by weight and the N-methylol acrylamide constitutes 0.1 to 5% by weight of the papermaking felt.

Serial No.: 10/800,936  
Conf. No.: 1276

- 3 -

Art Unit: 1731

9. (Original) The papermaking felt according to claim 1, characterized by further comprising a hydrophilic polyester resin.
10. (Original) The papermaking felt according to claim 9, characterized in that the hydrophilic urethane resin constitutes 0.5% to 10% by weight, the N-methylol acrylamide constitutes 0.1% to 5% by weight, and the hydrophilic polyester resin constitutes 0.5% to 5% by weight of the papermaking felt.
